

LeWorks Cofactory
Get your own factory!

 **LE.WORKS**

Your very own factory in China

LeWorks is a cofactory— a service for companies that want their own assembly factory without having to manage it. We handle all parts of the work that you don't want to do yourself.

A cofactory is a good choice for a company that wants to better control how its products are made. Greater control reduces the quality problems and avoids taxing conflicts with a contract manufacturer who sees the world differently from you.

Your private space, from 250 m²

You get your own private space, sealed off with walls and lockable doors.

We handle maintenance, security, cleaning and also give you access to shared areas.

Factory space starts from 250 m².

Furniture and equipment

We furnish your factory with an assembly line, warehouse and an office, if you need. Our maintenance staff handles repairs.

Tools and equipment

We buy and lease you the tools and machines you need. For more expensive machinery we work with a finance company.

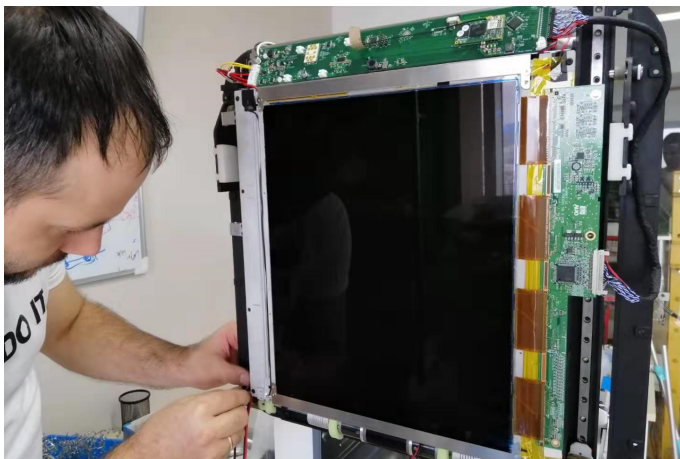

We manage the staff

We find, hire the factory staff you need. The staff wears uniforms with your logotype, letting your customers know that you are in control.

Professional sourcing service

The cofactory is designed for assembly work. To cover your needs for parts, we offer a sourcing services, helping you find and buy quality parts and products. We can also handle the entire supply chain, including exports.

R&D services

We can help you with prototyping and product development.

We offer services within: Mechanical engineering; Electronic engineering; PCB design and firmware

If you need anything else, let us know and we'll find it.

Company management

For companies that aren't established in China, we help setup and manage a local company, including accounting services.

If you need, you can use our R&D office, near the factory.

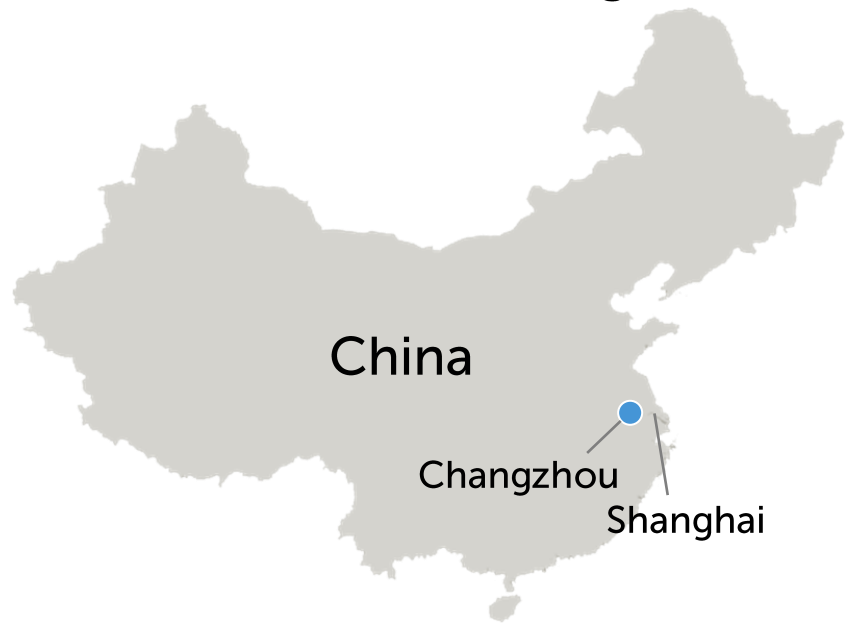

The location

Changzhou — ideal location for manufacturing

Changzhou is a fast growing city in the middle of the Yangtze river delta region, one of China's main industry areas.

Changzhou is the ideal location for an assembly factory. It has a vast access to all types of suppliers, well working shipping for exports and it's easy to get to from anywhere in the world.

Visiting Changzhou

Changzhou is only 40 minutes (2 train stops) away from Shanghai, with the comfortable bullet train, running at 350 km/hour.

You are welcome to use our R&D office as a base during factory visits. It's located next to the train station, and 10 minutes away from the factory.

Shipping from Changzhou

For International shipping we use the Shanghai port — the largest in the world. Surface shipping reaches Europe and North American in 35-45 days. Shipping by air takes about 7 days and uses one of the many international airports in the region.

Shipping by railway and road is also possible.

About LeWorks

LeWorks is a Swedish factory management company, based in Changzhou, China – a city next to Shanghai.

We started the company in response to the growing frustration that many companies experienced with unreliable sourcing and manufacturing, during Covid-19, when factory visits weren't possible.
